

Contribution Title

Name of First Author and Name of Second Author

Abstract Each chapter should be preceded by an abstract (no more than 200 words) that summarizes the content. Do not cite articles in abstract by using “cite” command. Instead write Family Name Authors (Journal Name Vol(issue) year, citation[lemma,theorem,page number, ...])

Key words: ; ; .

MSC2020: ; ; .

1 Section Heading

Instead of simply listing headings of different levels we recommend to let every heading be followed by at least a short passage of text. And please note that the first line of text that follows a heading is not indented, whereas the first lines of all subsequent paragraphs are [1].

Use the standard `equation` environment to typeset your equations, e.g.

$$a \times b = c , \tag{1}$$

however, for multiline equations we recommend to use the `eqnarray` environment

Name of First Author
Name, Address of Institute
e-mail: name@email.address

Name of Second Author
Name, Address of Institute

$$\begin{aligned}
|\nabla U_\alpha^\mu(y)| &\leq \frac{1}{d-\alpha} \int \left| \nabla \frac{1}{|\xi-y|^{d-\alpha}} \right| d\mu(\xi) = \int \frac{1}{|\xi-y|^{d-\alpha+1}} d\mu(\xi) \\
&= (d-\alpha+1) \int_{d(y)}^\infty \frac{\mu(B(y,r))}{r^{d-\alpha+2}} dr \leq (d-\alpha+1) \int_{d(y)}^\infty \frac{r^{d-\alpha}}{r^{d-\alpha+2}} dr \quad (2)
\end{aligned}$$

1.1 Lists

For typesetting numbered lists we recommend to use the `enumerate` environment – it will automatically rendered in line with the preferred layout.

1. Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development.
 - a. Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development.
 - b. Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development.
2. Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development.

For unnumbered list we recommend to use the `itemize` environment – it will automatically be rendered in line with the preferred layout.

- Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development, cf. Table 1.
 - Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development.
 - Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development.
- Livelihood and survival mobility are oftentimes coutcomes of uneven socioeconomic development.

2 Figures and Tables

3 Theorems etc.

Theorem 1 *Theorem text goes here.*

Definition 1 Definition text goes here.

Proof Proof text goes here. □

Fig. 1 If the width of the figure is less than 7.8 cm use the `sidecaption` command to flush the caption on the left side of the page. If the figure is positioned at the top of the page, align the sidecaption with the top of the figure – to achieve this you simply need to use the optional argument `[t]` with the `sidecaption` command

Table 1 Please write your table caption here

Classes	Subclass	Length	Action Mechanism
Translation	mRNA ^a	22 (19–25)	Translation repression, mRNA cleavage
Translation	mRNA cleavage	21	mRNA cleavage
Translation	mRNA	21–22	mRNA cleavage
Translation	mRNA	24–26	Histone and DNA Modification

^a Table foot note (with superscript)

Acknowledgements ...

Appendix

When placed at the end of a chapter, the numbering of tables, figures, and equations in the appendix section continues on from that in the main text. Hence please *do not* use the `appendix` command when writing an appendix at the end of your chapter or contribution.

$$a \times b = c \quad (3)$$
